

Submitting artwork?

Here's how you're artwork can
pass with flying colours...

We want your project to go as smoothly as possible. The pre-press checklist below can help resolve many of the simple problems that can occur before you submit your artwork to us.

If you have any questions regarding your artwork please contact our team and they'll point you in the right direction!

Pre-press checklist:

Have you selected the "PRESS PDF" option when generating your PDF?

Selecting this option will help resolve many issues with colour and image resolution. This option should convert all colours to CMYK (not RGB), embed your fonts and create a 300dpi high resolution PDF.

Is the artwork the correct size?

Have you added trim marks?

Have you added 3mm bleed around all edges of your document?

Are important objects (i.e. logos, text) at least 3mm from the trim edge?
